

JUNE REY TELLA-IN

Creative Portfolio

Multimedia Virtual Assistant

Your **Digital Swiss Army Knife** —
design, code, and strategy in one.

A Digital Problem Solver

June's a Multimedia Virtual Assistant with over 10 years of experience blending strategy and creativity with technology.

He's an Electronics Engineer by profession, which helps bring structure to his creative work across web design, graphics, video editing, content creation, and digital marketing.

He has worked across industries like healthcare, F&B, and retail, helping businesses solve problems and scale through smart, tech-driven solutions.

Skills Showcase and Platform Proficiency

Web Development

Builds responsive, functional websites - from setup to launch, including UX design and optimization.

Graphic Design

Creates engaging visuals that align with brand identity - from flyers and menus to logos and ad creatives.

Content Creation

Experienced in creating and publishing compelling content across various social media platforms.

Video Editing

Capable of producing basic videos and editing After Effects templates for campaigns, social media, and ads.

Technical SEO

Helps businesses increase visibility and rank higher in search results via metadata and performance optimization.

Digital Marketing

Well-versed in executing ad campaigns across Google and social platforms, and designing email marketing flows.

CRM & Automation

Helps boost efficiency with smart tech solutions, whether it's booking systems, lead generation or outreach.

System Administration

With a background in system admin and IT support, June's the go-to guy when something "just needs to work."

Website Development

Project Goal:

To modernize an outdated website and improve user experience, accessibility, and online conversion.

Role & Responsibilities:

Led the end-to-end website revamp, handling everything from planning, design, content migration, backend setup, to deployment — all independently.

Challenges Overcome:

Working solo, June had to carefully manage both the technical and creative aspects. Migrating legacy content while maintaining SEO and functionality posed a significant challenge, which he solved through structured workflows.

Positive Outcome:

The revamped site delivered a modern look and smoother navigation, resulting in a dramatic increase in online inquiries and a significant boost in online transactions.

Graphics Design

Project Goal:

To help increase revenue for a general manager's group of food and beverage businesses through impactful visual marketing.

Role & Responsibilities:

June designed a range of creatives — social media graphics, printed menus, promotional flyers, and large-scale signage.

Challenges Overcome:

Each establishment had different branding styles, audiences, and marketing needs. June adapted his design approach for each one, ensuring materials were on-brand and effective despite varying visual directions.

Positive Outcome:

Higher foot traffic, boosted online visibility, and increased order volume across several platforms — ultimately improving overall income for the group.

Content Creation

Project Goal:

To attract and engage a highly specific audience

Role & Responsibilities:

Produced a range of visually compelling, informative and sometimes promotional content — tailored to the target audience's interests and needs.

Challenges Overcome:

The target audience was very niche.
Messaging and visuals were fine-tuned to ensure maximum relevance and impact.

Positive Outcome:

Increased inquiries coming through social media platforms.

Video Editing

Project Goal:

To produce promotional videos for the launch of an online *digital sales and marketing channel & sales certification institute*.

Role & Responsibilities:

June led the entire video production process using tools like After Effects, Filmora, and Audition.

Challenges Overcome:

Developing virtual sets with limited tools was an impediment, but June managed to pull it off, creating one that matched the client's vision.

Positive Outcome:

The videos helped create strong interest and momentum, leading to high engagement during the channel's launch phase.

Technical SEO

Project Goal:

To improve the search visibility of a healthcare website by ranking higher for targeted industry-specific keywords.

Role & Responsibilities:

Focused on technical and on-page SEO improvements—optimizing website structure, enhancing page speed, improving metadata, and ensuring proper heading and keyword usage across key pages.

Challenges Overcome:

The website had slow load times and lacked some key SEO foundations. These were addressed by implementing caching, compressing assets, and cleaning up redundant code, all while aligning content structure with SEO best practices.

Positive Outcome:

The site saw a significant boost in keyword rankings, with several target terms climbing to the first page of Google. These improvements led to higher organic traffic and better lead generation for the client.

BEFORE

AFTER

Digital Marketing

Project Goal:

To optimize ad campaigns for better reach and performance while maintaining cost-efficiency.

Role & Responsibilities:

Refined the client's campaign strategies by adjusting audience targeting, improving ad copy, and enhancing visual content. Campaign performances were monitored and data-driven tweaks were made to boost results.

Challenges Overcome:

Meta increasingly limited ad targeting options. June had to adapt by creatively narrowing down interests and behaviors while still reaching qualified leads.

Positive Outcome:

The campaigns achieved wider reach and better engagement, all while using a relatively lower ad spend ratio.

Automation

Project Goal:

To streamline the collection and segmentation of potential leads

Role & Responsibilities:

Developed interactive online quizzes that not only calculated a user's risk score but also automatically sorted respondents into specific audience segments. These segments were then linked to tailored newsletter groups based on their risk level.

Challenges Overcome:

The manual process of sorting responses was time-consuming and prone to error. June automated the entire workflow — from scoring to audience tagging — by integrating forms with email marketing platforms.

Positive Outcome:

The automation made it much easier to follow up with prospects and personalize their experience.

Sleepiness Quiz

How likely are you to fall asleep or doze off in these situations?

Situation	No Chance	Slight Chance	Moderate Chance	Definite Chance
Sitting and reading*	☐ 0	☐ 1	☐ 2	☐ 3
Watching TV*	☐ 0	☐ 1	☐ 2	☐ 3
Sitting inactively in a public place (e.g. Theatre or meeting)*	☐ 0	☐ 1	☐ 2	☐ 3
As a passenger in a car for an hour without break*	☐ 0	☐ 1	☐ 2	☐ 3
Lying down to rest in the afternoon if circumstances permit*	☐ 0	☐ 1	☐ 2	☐ 3
Sitting and talking to someone*	☐ 0	☐ 1	☐ 2	☐ 3
Sitting quietly after lunch without alcohol*	☐ 0	☐ 1	☐ 2	☐ 3
In a car, while stopped for a few minutes in traffic*	☐ 0	☐ 1	☐ 2	☐ 3
Gender*	Male			
Location*	Metro Manila			
Date of Birth* (mm/dd/yyyy)				
Contact Number*				
Email*

System Administration

Project Goal:

To streamline project deployment processes and reduce turnaround time for testing and updates.

Role & Responsibilities:

June designed and implemented a localized development server and optimized workflow for the team.

Challenges Overcome:

With testing servers hosted on-site, every deployment was time-consuming and prone to delays. June identified bottlenecks in the existing process and addressed them through automation and better infrastructure setup.

Positive Outcome:

He successfully reduced deployment time from several hours to just minutes—greatly improving efficiency, minimizing delays, and accelerating team output.

The image shows a file explorer window with a directory tree on the left and a file list on the right. The directory tree includes folders like conf, local_backups, logs, private_html, public_html, wp-admin, wp-content, and wp-includes. The file list table below shows details for files in the wp-content directory.
